

Zacks All-Cap Core Fund

Institutional Class Shares – CZOVX

A series of the
Zacks Trust

SUMMARY PROSPECTUS

January 26, 2024

Before you invest, you may want to review the Fund’s Prospectus and Statement of Additional Information (“SAI”), which contain more information about the Fund and its risks. You can find the Fund’s Prospectus, SAI, reports to shareholders, and other information about the Fund online at www.zacksfunds.com. You can also get this information at no cost by calling 1-888-453-4003 or by sending an email request to wholesalesupport@Zacks.com. The current Prospectus and SAI, dated August 7, 2023, as amended January 26, 2024, are incorporated by reference into this Summary Prospectus.

INVESTMENT OBJECTIVE

The investment objectives of the Zacks All-Cap Core Fund are, primarily, capital appreciation and, secondarily, to provide shareholders with income through dividends.

FEES AND EXPENSES OF THE FUND

This table describes the fees and expenses that you may pay if you buy, hold, and sell shares of the Fund. **You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the table and example below.**

Shareholder Fees <i>(fees paid directly from your investment)</i>	Institutional Class
Maximum Sales Charge (Load) Imposed on Purchases (as a % of offering price)	None
Maximum Deferred Sales Charge (Load) (as a % of the lesser of amount purchased or redeemed)	None
Redemption Fee if redeemed within 30 days of purchase (as a % of amount redeemed)	2.00%

Annual Fund Operating Expenses <i>(ongoing expenses that you pay each year as a percentage of the value of your investment)</i>	Institutional Class
Management Fees	0.80%
Distribution and Service (12b-1) Fees	0.00%
Other Expenses ¹	0.30%
Total Annual Fund Operating Expenses	1.10%
Fee Waiver and/or Expense Limitation ²	(0.10)%
Net Annual Fund Operating Expenses	1.00%

1. Other expenses have been restated to reflect current contractual fees.

2. The Fund’s adviser, Zacks Investment Management, Inc. (the “Advisor”) has contractually agreed to reduce its fees and/or absorb expenses of the Fund, until at least March 31, 2026, to ensure that total annual fund operating expenses after fee waiver and/or reimbursement (exclusive of (i) any front-end or contingent deferred loads; (ii) brokerage fees and commissions, (iii) acquired fund fees and expenses; (iv) fees and expenses associated with investments in other collective investment vehicles or derivative instruments (including for example option and swap fees and expenses); (v) borrowing costs (such as interest and dividend expense on securities sold short); (vi) taxes; and (vii) extraordinary expenses, such as litigation expenses (which may include indemnification of Fund officers and Trustees, contractual indemnification of Fund service providers (other than the Advisor)) will not exceed 1.00% of the Fund’s net assets. These fee waivers and expense reimbursements are subject to possible recoupment from the Fund in future years (within the three years from the date the fees have been waived or reimbursed), if such recoupment can be achieved within the lesser of the foregoing expense limits or those in place at the time of recapture. This agreement may be terminated only by the Trust’s Board of Trustees on 60 days’ written notice to the Advisor.

Example. You may also incur usual and customary brokerage commissions and other charges when buying or selling shares of the Fund, which are not reflected in the example that follows. This example is intended to help you compare the cost of owning shares of the Fund with the cost of investing in other funds. The example assumes that you invest \$10,000 in the Fund for the time periods indicated and then sell all of your shares at the end of those periods. The example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses remain the same. The Example includes the Fund’s contractual expense limitation through March 31, 2026.

Although your actual costs may be higher or lower, based on these assumptions, your costs would be:

Class	One Year	Three Years	Five Years	Ten Years
Institutional	\$102	\$318	\$575	\$1,330

Portfolio Turnover. The Fund may pay transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in Annual Fund Operating Expenses or in the Example, affect the Fund’s performance. For the fiscal period ended November 30, 2022, the Fund’s portfolio turnover rate was 27% of the average value of its portfolio.

PRINCIPAL INVESTMENT STRATEGIES

The Fund pursues its investment objectives by applying a hybrid research process, which uses both quantitative and qualitative criteria. The Advisor uses the Zacks Rank, a proprietary model, to quantitatively assess the attractiveness of a large universe of stocks based primarily on an analysis of changing patterns of earnings estimates for a company. The primary aim of the Zacks Rank model is to identify those companies most likely to experience positive earnings estimate revisions. From a smaller universe of stocks that are highly ranked by the quantitative model (approximately 300 securities), the portfolio manager selects stocks with strong earnings potential using traditional “bottom-up” valuation metrics. Portfolio construction is driven by modern portfolio theory incorporating strict risk controls. Under normal circumstances, the Advisor expects to invest primarily in equity securities with an emphasis on equity securities of U.S. issuers. The Fund seeks to diversify its assets by investing in securities from a pool of more than one dozen industry sectors and over 200 industry groups. The Advisor allocates assets opportunistically based on market information and is not constrained by market capitalization or style parameters. Sector, capitalization and style allocations generally result from market trends regarding earnings information.

The Fund is designed to be a “core” fund that seeks to combine both value and growth characteristics. The Fund may invest a significant amount of its assets in one or more sectors from time to time. As of November 30, 2022, 25.5% of the Fund’s assets were invested in the consumer non-cyclical sector. Consumer, non-cyclical companies are companies that provide consumer staples. The sectors in which the Fund is more heavily invested will vary.

Under normal circumstances, the Fund invests primarily in equity securities of U.S. issuers. The Fund also may invest in equity securities of Canadian issuers and American Depositary Receipts (“ADRs”). ADRs are receipts that represent interests in foreign securities held on deposit by U.S. banks. In addition, the Fund may lend its portfolio securities to broker-dealers and other institutions as a means of earning additional income.

PRINCIPAL RISKS OF INVESTING IN THE FUND

Risk is inherent in all investing. The loss of your money is a principal risk of investing in the Fund. Investors should consider the following risk factors and special considerations associated with investing in the Fund, which may cause you to lose money. The following principal risk factors have been identified for the Fund. There can be no assurance that the Fund will be successful in meeting its investment objective.

Market Risk. The market price of a security or instrument may decline, sometimes rapidly or unpredictably, due to general market conditions that are not specifically related to a particular company, such as real or perceived adverse economic or political conditions throughout the world, changes in the general outlook for corporate earnings, changes in interest or currency rates, or adverse investor sentiment generally. In addition, local, regional or global events such as war, acts of terrorism, the spread of infectious illness or other public health issues, or other events could have a significant impact on a security or instrument. The market value of a security or instrument also may decline because of factors that affect a particular industry or industries, such as labor shortages or increased production costs and competitive conditions within an industry.

Equity Risk. The value of the equity securities held by the Fund may fall due to general market and economic conditions, perceptions regarding the industries in which the issuers of securities held by the Fund participate, or factors relating to specific companies in which the Fund invests.

Quantitative Model Risk. There are limitations inherent in every quantitative model. The factors used in quantitative analysis and the weight placed on those factors may not be predictive of a security’s value. In addition, factors that affect a security’s value can change over time and these changes may not be reflected in the quantitative model. Investments selected using the Zacks Rank and other quantitative models may perform differently from the market as a whole or from their expected performance. There can be no assurance that use of a quantitative model will enable the Fund to achieve positive returns or outperform the market.

Foreign Investment Risk. The prices of foreign securities may be more volatile than the prices of securities of U.S. issuers because of economic and social conditions abroad, political developments, and changes in the regulatory environments of foreign countries. Changes in exchange rates and interest rates, and the imposition of sanctions, confiscations, trade restrictions (including tariffs) and other government restrictions by the United States and/or other governments may adversely affect the values of the Fund's foreign investments. Foreign companies are generally subject to different legal and accounting standards than U.S. companies, and foreign financial intermediaries may be subject to less supervision and regulation than U.S. financial firms. Foreign securities include ADRs. Unsponsored ADRs are organized independently and without the cooperation of the foreign issuer of the underlying securities, and involve additional risks because U.S. reporting requirements do not apply. In addition, the issuing bank may deduct shareholder distribution, custody, foreign currency exchange, and other fees from the payment of dividends.

Growth-Oriented Investment Strategies Risk. Growth funds generally focus on stocks of companies believed to have above-average potential for growth in revenue and earnings. Growth securities typically are very sensitive to market movements because their market prices frequently reflect projections of future earnings or revenues, and when it appears that those expectations will not be met the prices of growth securities typically fall.

Value-Oriented Investment Strategies Risk. Value stocks are those that are believed to be undervalued in comparison to their peers due to adverse business developments or other factors. Value investing is subject to the risk that the market will not recognize a security's inherent value for a long time or at all, or that a stock judged to be undervalued may actually be appropriately priced or overvalued. In addition, during some periods (which may be extensive) value stocks generally may be out of favor in the markets.

Lending Portfolio Securities Risk. The Fund may lend its portfolio securities to broker-dealers and banks, provided that it may not lend securities if, as a result, the aggregate value of all securities loaned would exceed 33 1/3% of its total assets. The collateral, including the investment of any cash collateral, is subject to market depreciation. In the event of bankruptcy or other default of the borrower, the Fund could experience delays in both liquidating the loan collateral and recovering the loaned securities and losses. The collateral (including any investment of cash collateral) is not subject to the percentage limitations on the Fund's investments described elsewhere in this prospectus.

Management and Strategy Risk. The value of your investment is dependent upon the judgment of the Advisor about the quality, relative yield, value or market trends affecting a particular security, industry, sector or region, which may prove to be incorrect.

Income and Distribution Risk. The income that shareholders receive from the Fund through annual distributions is based primarily on the dividends and interest the Fund earns from its investments. Dividend payments the Fund receives in respect of its portfolio securities can vary widely over the short and long term.

Market Capitalization Risk. Larger, more established companies may be unable to attain the high growth rates of successful, smaller companies during periods of economic expansion. The securities of small-capitalization and mid-capitalization companies may be subject to more abrupt or erratic market movements and may have lower trading volumes or more erratic trading than securities of larger, more established companies or market averages in general. In addition, such companies typically are more likely to be adversely affected than large capitalization companies by changes in earning results, business prospects, investor expectations or poor economic or market conditions.

Recent market events. Periods of market volatility may occur in response to market events and other economic, political, and global macro factors. For example, in recent years the COVID-19 pandemic, the large expansion of government deficits and debt as a result of government actions to mitigate the effects of the pandemic, Russia's invasion of Ukraine, and the rise of inflation have resulted in extreme volatility in the global economy and in global financial markets. These and other similar events could be prolonged and could adversely affect the value and liquidity of the Fund's investments, impair the Fund's ability to satisfy redemption requests, and negatively impact the Fund's performance.

Sector Focus Risk. The Fund may invest a larger portion of its assets in one or more sectors than many other mutual funds and thus will be more susceptible to negative events affecting those sectors. For example, as of November 30, 2022, 25.5% of the Fund's assets were invested in the consumer non-cyclical sector. Consumer, non-cyclical companies are companies that provide consumer staples, for example, food and drug retailers and companies the primary lines of business of which are food, beverage, pharmaceuticals and other household items, including agricultural products. Performance of companies in the consumer, non-cyclical sector may be adversely impacted by fluctuations in supply and demand, changes in the global economy, changes in the price and availability of underlying commodities, rising energy prices, consumer spending, competition, demographics and consumer preferences, and production spending. Companies in the consumer, non-cyclical sector are also affected by changes in government regulation; global economic, environmental, and political events; and economic conditions.

Cybersecurity Risk. Cybersecurity incidents may allow an unauthorized party to gain access to Fund assets, customer data (including private shareholder information), or proprietary information, or cause the Fund, the Advisor, and/or other service providers (including custodians, sub-custodians, transfer agents and financial intermediaries) to suffer data breaches, data corruption or loss of operational functionality. In an extreme case, a shareholder's ability to exchange or redeem Fund shares may be affected. Issuers of securities in which the Fund invests are also subject to cybersecurity risks, and the value of those securities could decline if the issuers experience cybersecurity incidents.

PERFORMANCE INFORMATION

The following bar chart and tables provide an indication of the risks of investing in the Fund by showing changes in the Fund's Institutional Class performance from year to year and by showing how the average annual total returns for each class compared to that of a broad-based securities market index. The Fund acquired all of the assets and liabilities of the Zacks All-Cap Core Fund (the "Predecessor Fund"), a series of Investment Managers Series Trust (the "Predecessor Trust"), in a tax-free reorganization on January 26, 2024. In connection with this acquisition, Institutional Class shares of the Predecessor Fund were exchanged for Institutional Class shares of the Fund. The Predecessor Fund had an investment objective and strategies that were, in all material respects, the same as those of the Fund, and were managed in a manner that, in all material respects, complied with the investment guidelines and restrictions of the Fund. The performance information set forth below reflects the historical performance of the Predecessor Fund's shares. Prior to October 31, 2016, Institutional Class Shares were designated as Class A Shares, which were subject to a 5.75% sales charge that is not reflected in the total return figures. You should be aware that the Fund's past performance (before and after taxes) may not be an indication of how the Fund will perform in the future. Updated performance information is available on the Fund's website at: www.zacksfunds.com or by calling 1-888-453-4003.

Calendar-Year Total Return (before taxes) for Institutional Class Shares For each calendar year at NAV

Institutional Class Shares		
Highest Calendar Quarter Return at NAV (non-annualized):	18.66%	Quarter Ended 06/30/2020
Lowest Calendar Quarter Return at NAV (non-annualized):	(18.59%)	Quarter Ended 03/31/2020
Year-to-Date Return	15.18%	Quarter Ended 06/30/2023

Average Annual Total Returns for the Periods Ended December 31, 2022	1 year	5 years	10 years
Return Before Taxes			
Institutional Class Shares	(18.28)%	8.28%	10.78%
Return After Taxes on Distributions			
Institutional Class Shares	(20.38)%	6.22%	9.03%
Return After Taxes on Distributions and Sale of Fund Shares			
Institutional Class Shares	(9.20)%	6.38%	8.61%
Russell 3000 Index (Reflects no deductions for fees, expenses or taxes)	(19.21)%	8.79%	12.13%

After-tax performance is presented only for Institutional Class shares of the Fund. Actual after-tax returns depend on the investor's individual tax situation and may differ from the returns shown. After-tax returns are not relevant for shares held in tax-advantaged investment vehicles such as employer-sponsored 401(k) plans and individual retirement accounts (IRAs). The after-tax returns shown are calculated using the highest individual federal marginal income tax rates in effect during the periods presented and do not reflect the impact of state and local taxes.

MANAGEMENT

Investment Advisor. Zacks Investment Management, Inc., is the Advisor to the Fund.

Portfolio Manager. Mitch Zacks, Principal & senior portfolio manager of the Advisor, has served as a portfolio manager of the Fund since its inception in December 2005.

PURCHASE AND REDEMPTION OF SHARES

Institutional Class Shares

Minimum Investments	To Open Your Account	To Add to Your Account
Direct Regular Accounts	\$5,000	\$1,000
Direct Retirement Accounts	\$2,000	\$500
Automatic Investment Plan	\$5,000	\$500
Gift Account For Minors	\$2,000	\$500

The eligibility requirements are described in this Prospectus under “How to Buy and Sell Shares” and on the Fund’s website. We may reduce or waive the minimums or eligibility requirements in certain cases.

The Fund’s shares are available for purchase and are redeemable on any business day through your broker-dealer and directly from the Fund by mail, facsimile, telephone, or bank wire. Purchase and redemption orders by mail should be sent to Zacks All-Cap Core Fund, c/o Ultimus Fund Solutions, LLC, Via Regular Mail: P.O. Box 541150, Omaha, Nebraska 68154 or Via Overnight Mail: 4221 North 203rd Street, Suite 100, Elkhorn, Nebraska 68022-3474. Please call the Fund at 1-888-453-4003 to conduct telephone transactions or to receive wire instructions for bank wire orders. Investors who wish to purchase or redeem Fund shares through a broker-dealer should contact the broker-dealer directly.

TAX INFORMATION

The Fund’s distributions will generally be taxed to you as ordinary income or capital gains, unless you are investing through a tax deferred arrangement, such as a 401(k) plan or an IRA. Distributions on investments made through tax deferred vehicles, such as 401(k) plans or IRAs, may be taxed later upon withdrawal of assets from those accounts.

PAYMENTS TO BROKER-DEALERS AND OTHER FINANCIAL INTERMEDIARIES

If you purchase shares of the Fund through a broker-dealer or other financial intermediary (such as a bank), the Advisor, or other related companies may pay the intermediary for marketing activities and presentations, educational training programs, conferences, the development of technology platforms and reporting systems, or other services related to the sale or promotion of the Fund. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary’s website for more information.
